Logo Project Step 1/4

ART 130 - INTRO TO GRAPHIC DESIGN

Use this template file to gather and analyze various good and bad logos. Organize your findings into related and non-related to your company groupings. Draw on or highlight the things all of the good logos have in common. You may even want to create a page of BAD logos as well. Point out what things we may want to avoid when brainstorming our logos as well.

Second, you should gather images or photographs relevant to your company. You might gather images of a specific type of reptile to help you incorporate elements of their anatomy better into your final piece. Remember logos are distillations or simplifications of complex ideas, so having more examples will help you to identify trends and will help you simplify your symbol concepts and sketches later.

Finally, print out and sketch on the last pages. You will want to look at the image examples of good and bad logo sketches. Use a black gel pen and sharpie or prisma color marker to draw your ideas. Make your logos solid rather than outlined, logos should be bold. Remember you are only drawing the symbol portion of the logo and not really worrying about the typography yet. Just focus on the symbol sketches this week.

STUDENT NAME: **Marchylia F. P. Pratikto.**

LOGO PROJECT PART 1:

Type a description of what was challenging about this project so far. What have you learned about yourself, about your abilities and limitations? How good at coming up with unique and different solutions are you?

What was challenging was coming up with the ideas of logo designs and styles. I learned that I am creative and able to even designed many logos, also within the sketches, I managed to illustrate the idea that I had in mind. I can say that I am pretty good with developing unique solutions.

LEARNING SUMMARY:

Write a summary of learning in this area. Simply replace this description with your own summary of what you learned about the principles as you completed this assignment. You may find it helpful to answer the following questions in your learning summary:

1. How did the logo worksheet help you in your research and sketching?
2. What did you learn by analyzing good logos? What do you think good logos have in common?
3. Why do you think most logos aren't illustrations but rather solid shapes or bold symbols?
4. What did the play exercise have to do with logo design?
5. How can you apply what you learned from the play exercise when trying to develop a symbol for your logo?

Add your own insights as well....

etc.. (remember to feel free to replace this entire block of text with your own answers (including the text above)

The logo worksheet helps me in a way that I am able to start coming up with ideas of what to design as a logo and not just an illustration. The word list reminds me of what to think about while creating each logo.

LOGO WORKSHEET:

This worksheet should be filled out BEFORE you start sketching the brandmark portion of your logo signature. Please replace the "_____ with your own text.

Project Details:

Design a logo for a(n) "clothing store (company) and type of culture (theme)"

Company/Exhibit Name:
"Balinese Batik"

Tagline:
"The Beauty of Balinese Traditional and Style of Batik"

Exhibit Details:

"Balinese Traditional & Batik Clothings (Performance Clothings/Customs)"

Target Audience (who are the people you are communicating to with this logo?):

"Travelers & International"

Project Objective:

"Target Audience: tourists/travelers, anyone who is interested in Balines culture, performers and performance -groups"

Emotional/Rational Characteristics (what mood should be conveyed by this logo? What ideas should it communicate?):
"Sense of Culture"

RESEARCH:

Include a synopsis for any research you conducted here (articles read, information gleaned, etc.). Remember to include bibliography information for each resource.

History of Indonesian Batik
<http://www.expat.or.id/info/batik.html>

Java and Bali, Indonesia Batik

LOGO INSIGHTS:

Collect at least thirty logos that you will use for inspiration throughout this project. Then type a summary of what good logos have in common. What things should you try and incorporate when designing your own logos?

LEARNING SUMMARY:

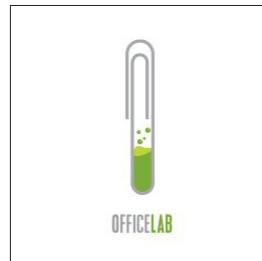

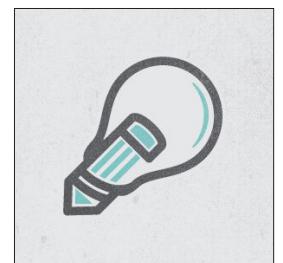

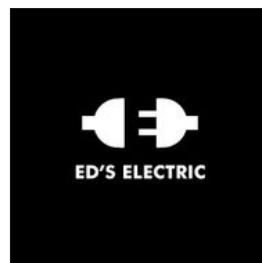

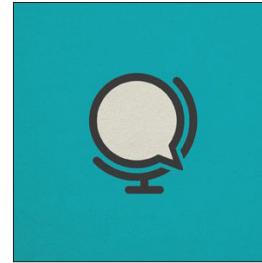

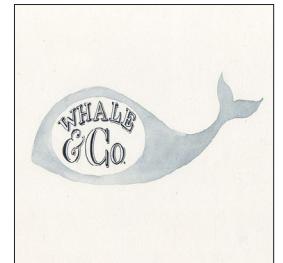

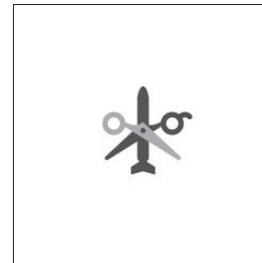

Write a summary of learning in this area. Simply replace this description with your own summary of what you learned about the principles of good logo design by studying these good logos. List your insights below:

1. Insight One
2. Insight Two
3. Insight Three
4. Etc.

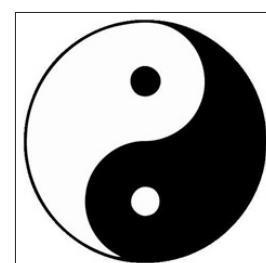

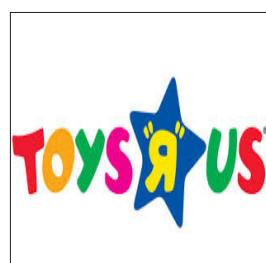

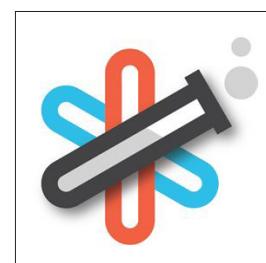

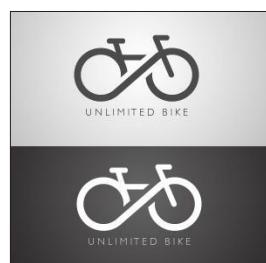

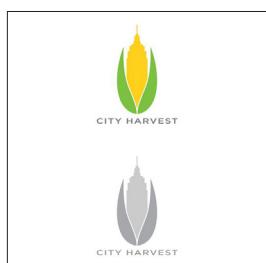

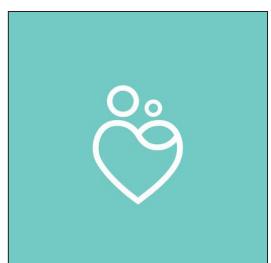

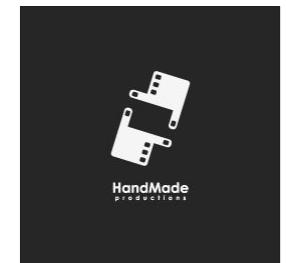

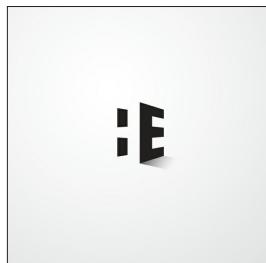

Add your own insights as well....

etc.. (remember to feel free to replace this entire block of text with your own answers (including the text above)

Good logos are able to or would be able to combine characters together. Easy to read, yet creative. Simple, yet points out or brings out the idea. If not as simple, the logos still representing the theme. Good logos can represent well and able to attract the audience's attention using the Principles of Design, combination of colors, and style of texts.

Logo Project Part 2

ART 130 - INTRO TO GRAPHIC DESIGN

Use this template file to gather and analyze various good and bad logotypes. Organize your findings into related and non-related to your company groupings. Draw on or highlight the things all of the good logotypes have in common. You may even want to create a page of BAD logotypes as well. Point out what things we may want to avoid when brainstorming our logotypes as well. What trends do you notice? What should you avoid? etc...

Second, select your favorite 3 concepts from last week and place them on the appropriate page. Then create at least 10 sketches for each concept to refine the idea and clean it up and prepare it for digital creation.

Finally, create 3 digital variations of each of the 3 concepts. Place the sketch on the template page for reference. (you should have a total of 9 digital variations when you are finished. Then Select 3 possibel fonts for each of the 3 concepts and list them on the appropriate page in this template file. You should have a total of 9 fonts altogether. Make sure you write the name of the font you selected in the space provided.

STUDENT NAME: Marchylia F. P. Pratikto

LOGO PROJECT PART 2:

Type a description of what was challenging about this project so far. What have you learned about yourself, about your abilities and limitations? How good at coming up with unique and different solutions are you? What did you struggle with in sketching and how can you refine your thinking this week? What hadn't you noticed before about typography as it relates to logos?

What was challenging was creating the Logos digitalized, because I did or designed hard logos to replicate digitally. Even though it took me awhile within the digitized design part, I did pull it through.
Whether sketching or digitalizing logos, I think I did pretty good. Typography has to be readable, so the complication was, which I tried my best, within creating or getting the text or the brandmark design with the same or at least similar character as the logo design.

LEARNING SUMMARY:

Write a summary of learning in this area. Simply replace this description with your own summary of what you learned about the principles as you completed this assignment. You may find it helpful to answer the following questions in your learning summary:

1. How did researching good logotypes (fonts) help you with your signature?
2. What trends did you notice in your research?
3. Why do you think most fonts used in logos were simple rather than illustrative or ornate?
4. What common problems did you exhibit last week that you worked on this week?

Add your own insights as well....

etc.. (remember to feel free to replace this entire block of text with your own answers (including the text above)

Whether sketching logos or digitalizing it, the Principle of Design still apply. From the Balance (Symmetrical) within the typography to Emphasis (Focal Point, Visual Hierarchy, and Contrast) within the graphics.

Logo Project Part 3

ART 130 - INTRO TO GRAPHIC DESIGN

Use this template file to complete this weeks part of the logo assignment. First you will be selecting your 2-3 favorite directions from last week. Place those in the appropriate place in this template file. Then you will Refine your brandmarks based on feedback from class members as well as the instructor.

Second, create 16 signature variations (combining your brandmarks with logotypes). Create multiple versions of each signature exploring different font choices as well as placement options. Remember to think about how you can alter or modify the fonts/type to reflect the style or personality of your brandmark more appropriately. You will want to DRAW half of the logotypes and render the other half digitally (this means you create at least 8 hand drawn versions where you re-draw the symbol portion or brandmark and combine it with a drawn logotype (not handwritten letters, drawn fonts...see image above)

Finally, create 16 color variations of 2-3 of your best signatures (16 total variations minimum). This is your chance to explore the color you will use in your logo. Pay attention to the principles of color you learned from the book.

STUDENT NAME: Marchylia F. P. Pratiktov

LOGO PROJECT PART 3:

Type a description of what was challenging about this project so far. What have you learned about yourself, about your abilities and limitations? How good at coming up with unique and different solutions are you? What did you struggle with in sketching and how can you refine your thinking this week? What hadn't you noticed before about typography as it relates to logos?

Add your own insights as well....

etc.. (remember to feel free to replace this entire block of text with your own answers (including the text above)

To have researched for good logotypes helped me with choosing a better typography that would better fits with my logo; having a better combination when both puts together. I have noticed that for logos, the simpler typographies are being used and that is because it is legible and would be easier to catch attentions. My problem is within the simplicity of my logo, too much is going on within the logo that a simple typography is perfect for it.

BRANDMARK SELECTIONS WITH REFINEMENTS:

Type a description of why you felt these brandmarks were the best and what you did to improve them.

LEARNING SUMMARY:

Write a summary of learning in this area. Simply replace this description with your own summary of what you learned about designing logos by working through this step. List your insights below:

Add your own insights as well....

etc.. (remember to feel free to replace this entire block of text with your own answers (including the text above)

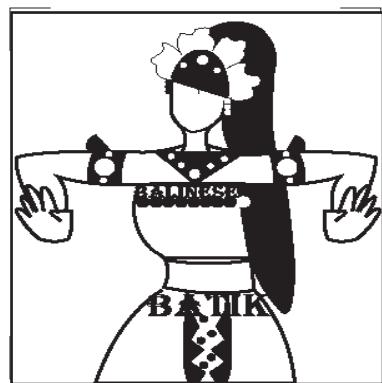

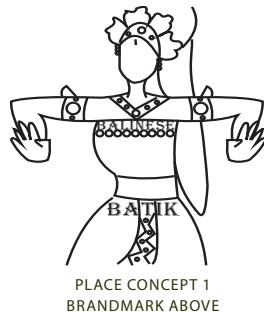

I learned that Logos are supposed to be simple, yet it should summarize the idea. A logo should not look too much, though we can be creative in designing it. I should have done the skeleton versions of my design sketches, that would have helped with the whole idea.

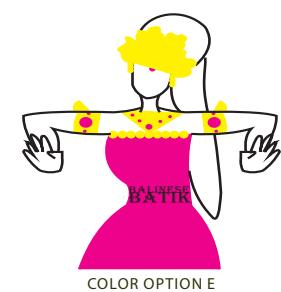

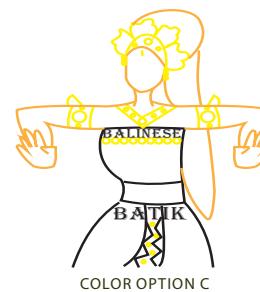

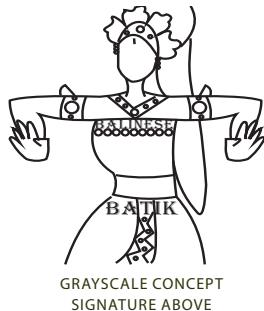

PLACE BEST BRANDMARK
1 ABOVE

PLACE BEST BRANDMARK
2 ABOVE

COLOR OPTION I

COLOR OPTION J

COLOR OPTION S

COLOR OPTION T

OPTION 1:

I have only 3 colors for this option (which indeed 3 is the limit) and yet it brings out that quality of the colors and the bright characteristic of Balinese culture.

OPTION 2:

This option looks less complicated and looks more like a logo because of its simplicity of the silhouette, yet it keeps the feel of Balinese within it.

Logo Project Part 4

ART 130 - INTRO TO GRAPHIC DESIGN

Use this section to include final refinements, last minute exploration, etc.

Second, make sure you include a copy of your final logo.

Finally, remember to include an overall learning summary for the project.

Most of the remaining pages are blank. Include what you feel will best show that final stages of your design process for this project. Feel free to add more pages as necessary.

STUDENT NAME: Marchylia F. P. Pratikto

LOGO PROJECT PART 4:

Type a description of what was challenging about this project so far. What have you learned about yourself, about your abilities and limitations? How good at coming up with unique and different solutions are you? What did you struggle with in sketching and how can you refine your thinking this week? What hadn't you noticed before about typography as it relates to logos?

LEARNING SUMMARY:

Write a summary of learning in this area. Simply replace this description with your own summary of what you learned about the principles as you completed this assignment. You may find it helpful to answer the following questions in your learning summary:

1. How did the refinement process go for your logo?
2. What do you understand about value and contrast in relationship to color?
3. What visual cues did you use to make your final decision about pairing your symbol and logotype?
4. What common problems did you exhibit last week that you worked on this week?

Add your own insights as well....

etc.. (remember to feel free to replace this entire block of text with your own answers (including the text above)

I really did design complicated logos that it was difficult for me to put no more than 3 colors and to simplify the design in general. To include the typography into it was not as difficult as when I had to generate the colors. I pick colors that can match and pleasing to the eyes. I tried to make sure the colors that stands out are the colors for the intended items, which are the clothings and accessories. I tried to emphasize the main objects within the logo symbols. For the brandmark, I tried to pick fonts or the typography that would best match the design of the logo symbols/graphics.
